

Secretary Dortch,

Please do not force the user of a caption call phone to do anything further when making a call. The original format has worked fine for me. I wear two hearing aids and it is the only way that I can conduct telephone calls with friends or family, or an occasional business connection. I am the only person that uses my caption phone, as other family members use our other hand set.

The current format has been working so well that I would not like to see the necessity to make it more idfficult for me.

Thank you. Audree Ayres
