Secretary  
Federal Communications Commission  
445 12th Street SW  
Washington, DC 20554

Re: Submittal of unsolicited information for consideration under Wireless E911 Location Accuracy Requirements, PS Docket No. 07-114

Dear Ms. Dortch:

TechnoCom Corporation ("TechnoCom") has had the honor to serve on the Communications Security, Reliability and Interoperability Counsel ("CSRIC") Working Group 3 and also be the independent 3<sup>rd</sup> party responsible for the conduct and management of indoor tests that were performed in the Bay Area. TechnoCom was retained by TruePosition to perform an independent test of TruePosition's indoor location accuracy technology.

TechnoCom independently performed the indoor tests in Wilmington during February and early March of 2013. The tests were designed to be as similar and as equivalent as possible to the indoor testing that was performed by CSRIC in the Bay Area. In the accompanying report, TechnoCom presents a summary of this indoor testing effort in Wilmington and the associated indoor location performance results of TruePosition's technology.

Sincerely,

Masoud Motamedi  
President  
TechnoCom Corporation
