

Federal Communications Commission

RE: 12-375, Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996

To Whom it May Concern:

There are 2.7 million children who have one or both parents incarcerated, and for most a phone call is the only way they can stay in touch. But the cost of receiving a phone call from prison is too expensive, in some cases being as much as \$20 for 15 minutes. Current rates for interstate phone calls from prison are much higher than regular long distance calls, and vary state by state. Regulation is necessary because these costs place an unfair burden on the families of incarcerated people – many of whom live at or around the poverty line – and telephone companies can't be depended on to lower the phone rates on their own. Lowering the rates of long distance phone calls from prison will keep families strong and communities safe, reduce recidivism, and ensure prisoners successfully re-enter society upon release. To increase communication between families and prisoners, reduce incarceration, and support successful re-entry, the FCC needs to set a fair cap on what prison telephone companies are allowed to charge for long distance phone calls.

Sincerely,

Dianne Patrick

RE: 12-375, Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996

To Whom it May Concern:

It is understandable that our country doesn't have much sympathy for prisoners. But what about the prisoners' families? And what about the efforts to turn prisoners' lives around so they can at some point become productive members of society? There are 2.7 million children who have one or both parents incarcerated, and for most a phone call is the only way they can stay in touch. But the cost of receiving a phone call from prison is too expensive, in some cases being as much as \$20 for 15 minutes. RE: 12-375, Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996

To Whom it May Concern:

There are 2.7 million children who have one or both parents incarcerated, and for most a phone call is the only way they can stay in touch. But the cost of receiving a phone call from prison is too expensive, in some cases being as much as \$20 for 15 minutes. Current rates for interstate phone calls from prison are much higher than regular long distance calls, and vary state by state. Regulation is necessary because these costs place an unfair burden on the families of incarcerated people – many of whom live at or around the poverty line – and telephone companies can't be depended on to lower the phone rates on their own. Lowering the rates of long distance phone calls from prison will keep families strong and communities safe, reduce recidivism, and ensure prisoners successfully re-enter society upon release. To increase communication between families and prisoners, reduce incarceration, and support successful re-entry, the FCC needs to set a fair cap on what prison telephone companies are allowed to charge for long distance phone calls.

But the cost of receiving a phone call from prison is too expensive, in some cases being as much as \$20 for 15 minutes. Current rates for interstate phone calls from prison are much higher than regular long distance calls, and vary state by state. Regulation is necessary because these costs place an unfair burden on the families of incarcerated people – many of whom live at or around the poverty line – and telephone companies can't be depended on to lower the phone rates on their own. Lowering the rates of long distance phone calls from prison will keep families strong and communities safe, reduce recidivism, and ensure prisoners successfully re-enter society upon release. To increase communication between families and prisoners, reduce incarceration, and support successful re-entry, the FCC needs to set a fair cap on what prison telephone companies are allowed to charge for long distance phone calls.

Sincerely,

RE: 12-375, Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996

To Whom it May Concern:

There are 2.7 million children who have one or both parents incarcerated, and for most a phone call is the only way they can stay in touch. But the cost of receiving a phone call from prison is too expensive, in some cases being as much as \$20 for 15 minutes. Current rates for interstate phone calls from prison are much higher than regular long distance calls, and vary state by state. Regulation is necessary because these costs place an unfair burden on the families of incarcerated people – many of whom live at or around the poverty line – and telephone companies can't be depended on to lower the phone rates on their own. Lowering the rates of long distance phone calls from prison will keep families strong and communities safe, reduce recidivism, and ensure prisoners successfully re-enter society upon release.
