

A verizon tech who installed Fios network cut 2 wires from the protection of white box and the government regulated router is being federal crime "piggybacked" by Kansas router to trade from N. Jupiter, W. Walnut Rd. And N. Kirby street in Garland Texas. Their agent associates said quote, "Is that what your going to tell them." VERIZON INC. From same ideas as was by Comcast the have network pixma to see uncovered signals.

Contact me via mail I need to be contacted since my identity theft has taken place. Both should be investigate by higher authority because very un thorough and they are still using Linux router and the corporate office should be informed for supervisor of FCC.gov to check MAC address. Using remote on android to arrest <https://www.fbi.gov>

Trading making let Department of Justice know.

Help,

Thank you
