

Please do NOT make a move that will, in effect, allow an increase in nudity or profanity on TV. I had written earlier and left out the NOT. Please disregard that submission. TV is already at a point that children are damaged by it, and adults are insulted or pushed toward salacious things. An increase will only make matters worse. Our own TV viewing has declined as the trashy content has increased. Allowing it to get even worse will only result in a shrinking TV market as families more and more opt out of watching. And it will titillate those who do watch, increasing the market for porn and furthering the deterioration of the moral climate, which will result in further deterioration of respect for law, business contracts and integrity. A nation of voyeurs is not a stable base on which to build future prosperity. Do NOT allow the increase in nudity and profanity!
