

It is already difficult to watch or allow my family to watch TV because of all the overt and covert sexual references on TV. Most shows now are also so full of bleeps and "acceptable" bad language that it is ridiculous. We don't talk this way at home nor do we hear such things in any of the circles in which we socialize. Making these things appear to be just part of everybody's every day life only forces it into society as a whole (which may be the intent in the first place). If more corruption of programming is allowed our TV watching will be eliminated altogether.

Thank you.....
