

I am really not liking this decision by the FCC to drop restrictions on nudity and the F word. There are channels on satellite and cable where these things are allowed. People already have the right to watch these channels if they want to. Please don't make this available on all channels. You would be infringing on the rights of decent people that don't care to hear or see this type of behavior on television. I truly hope you reconsider this awful decision.

Mrs. Tyrrell
