

Please do NOT lift your current bans on profanity, expletives and nudity, even if brief or "fleeting". Public television already has enough pollution without degrading civil society further. My wife and I already have enough trouble finding something on television that isn't corrupted, vile and/or totally evil. Let those who wallow in filth get it from cable channels and internet sources that aren't policed. Your job is to protect the public. We are part of that public. Please protect us.
