

I was born in Syracuse , NY on V-J Day and feel I have lived in a wonderful life in the USA. It now appears each day I see our country eroding in morals and security making it harder and harder for married coupled families to raise their children. We have already loosened divorce laws, taken away tax incentives for married couples, inflicted Fair Housing Laws which in some cases protect life -style situations which erode society. Now we have TV and Radio programming which want even more loosening of our moral standards. The FCC needs to Help us Raise our Children and Grandchildren in a Positive Society which we are producing Workers and not dependents on our Society. Putting nudity and profanity on the air does not promote a Responsible society.

Please, Please do not relax any more of your standards for broadcasting nudity, sex, and explotives. In fact ,we as taxpaying citizens even wish you could rein in some of the morally loose programing.

Thank you for your consideration of my request.
