

This is totally unacceptable. Please reconsider this proposal immediately. I do not use these words routinely and certainly don't want to hear them on television.

As for female frontal nudity...a bit unilateral would't you say...ACLU would have you on this one. However, this is beyond belief that you would even consider this in a age where violence against females has escalated to endemic proportions.

There are already stations that carry this type of media which we can control...how do they expect us to do so on general television?

If passed, I promise, I will start a nation-wide boycott against television which will affect the cable companies because we will demand that such language and video display of nudity be removed or we will not watch or pay.

Once again FCC, this is just another reason I constantly say these days that I am ashamed to be an American.
