

I am greatly disturbed by reports that the FCC is going to relax content regulations on Broadcast Radio and TV. The allowance of the B-word outside of British context has had a devastating effect on the quality of entertainment in America. We don't need it to be any worse.

The F-word is an acronym for Fornication Under Consent of the King. It was used to designate brothels and other dens of degradation. That is why its use is deemed to be obscene and therefore NOT protected by the 1st Amendment.

Nudity is simply pornography. It too has been long held to be obscene and therefore not protected by the 1st Amendment, and so it is banned from Broadcast. In fact it is technically banned from TV Period, but that ban is not enforced.

I encourage you to please keep our living rooms, cars, and workplaces clean of this filth. Please keep the bans on obscene language and imagery in TV and Radio. Please Keep America Clean. If "artists" need to use this material, do it in print or Online. If people really need to consume this material (hard to believe) they know where to find it.
