

To Whom This May Concern:

If the report is true, that the FCC is considering dropping bans on the "f" and "s" word and also permitting nudity on TV is true, I would ask you to seriously reconsider this permission. Yes we have free speech, but we also need speech with responsibility. Unfortunately, it seems that our current culture is becoming more accepting of degrading speech and images. This will not help the public, but just debase us even further.

For the sake of my grandchildren and our society as a whole, please keep the current standard.

Thank you for your consideration.

Glen Richardson
