

I urge you to maintain the present standards of speech and nudity in broadcasting. Please do not allow the use of profane language and frontal nudity of women. I know many men that have struggled with pornography and are fighting to respect women, not see them as objects. Nor do I want my grandchildren exposed to unnecessary language and nudity.

I see no benefit to our society to remove moral standards of speech and dress. There are enough mediums available for such "freedom". My concern is the elimination all boundaries in the future.

Additionally, I believe a change in the present law is the desire of a minority, not the majority of Americans.

Thank You.
