

I urge you not to regress in your standards and responsibility to the citizens of the US. This issue first appeared with FCC Chairman Newton Minnow decades ago. Why would it be acceptable in today's world of liberal mandates and lack morals? The years have passed but it is vital for the cause of decency and morality of our great country to not fall for even "fleeting" moments of profanity and nudity. Do not "cave" in to special interest groups whose agenda is nothing short of undermining the integrity and wholesomeness of our nation. You were elected and appointed to do what is morally correct on the great and vast airwaves of our nation. I implore you to stop bending over to the egregious assertions of those who would care less of themselves and our youth in these trying periods of our existence. DO WHAT IS RIGHT and forget about authorizing this insaneness.
