

The proposal to allow the most obscene of all words "F-word" and explicit nudity on the public airways during times when children are in the audience (ie. "safe harbor hours") is NOT in the best interest of my family. I have three sons and such programming will HARM my sons and goes directly against what I am trying to teach them.

The FCC has the right to enforce standards for the public airways and any changes to loosen standards that have been in place for almost a hundred years is NOT WARRANTED. Broadcasters can easily delay and catch profanity, but choose not to use the technology. Rating systems are abused by broadcasters and are not accurate, because a stricter rating will cost them advertising money.

Keep nudity and profanity OFF THE PUBLIC AIRWAYS, and ENFORCE what the Supreme Court has given the FCC the power to do.
