

I oppose any changes to the current decency standards now allowed by the FCC. There is no place for allowing frontal nudity and expletives via the airways whether television or radio at any time especially when children may be watching or listening. I have 7 grandchildren and do not want them experiencing this kind of garbage through the media or anywhere else. It is hard for me to fathom that the FCC would even entertain such filth being allowed or proposed. You should be encouraging more programs as the "BIBLE" that just aired and not pure garbage.
