

I was very disturbed by your recent proposal to lift ban on nudity and explicit language on television and radio in our country. As a country, we seem to be fighting an uphill battle with our culture of extreme sexuality and vulgarity. I appreciate knowing that there is some filter in place now, and the fact that it could be removed is upsetting. Please do not allow more indecency onto our airwaves, help us to raise men and women who respect privacy and a standard moral code in our society. I am sure our founding father's did not have this in mind when they considered free speech! I urge you to reject all proposals that would lift or relax the ban that is currently in place. Thank You.
