

Please do NOT change the FCC ruling to include profanity and nudity on TV. Our younger generation of children already hear enough F words on the street and to have to listen to it on TV makes me sick to even think of it.

A large part of our population DOES NOT USE CURSE WORDS OR VULGAR WORDS in conversation with others, so why are you forcing it on us through the media? Your job is to remain fair and balanced with regard to limitations put on language used in the media, and protect us from having to be exposed to this kind of language. So do your job and don't cave into the filthy slang cuss words that have infiltrated our society. Once you open this door...you can never close it. What will you allow next to be seen and heard on TV?

I totally object to nudity on television as well and you should also want to protect youngsters from seeing it.

This is exactly how kids get into watching porn...it starts with just a simple quick scene showing a naked body and then they're hooked. Shame on you for even considering allowing it on TV. How low has the FCC gone just to be "politically correct".
