

I would like to strongly state that I do not think that on the radio, TV or other similar media that foul language and other disgusting be spoken on the radio, TV, TV commercials and other shows be allowed. Our society is in a free fall and the radio and TV media are all degenerating before our eyes. Our adults and especially our teenagers and other young people will be hearing the foul language and cursing and they will soon think that the vulgar, sexually oriented language will be common place. Our country used to be respectful and clean, but the society is being degraded. I STRONGLY believe that the "F-word" swearing, taking God's name in vain, sexually suggestive statements, partial or full nudity has no place in our society. The only place that it would be even partially acceptable would be with adults who chose that life style in private venues. Thank to you for taking my comments and i feel strongly about them.
