

The purpose of this is to comment on the proposed standards for profanity and nudity on public media including Television, Radio and cable. If the standards are lowered to allow the F-word, N-word, so called non-sexual nudity will continue to degrade our culture and will especially demean our girls and women. It insults most major religions including Christianity, Islam and Judism. It undermines respect that we would teach our children for those in authority and for our women. I lead a medium size congregation in the city of Romulus and it would absolutely affect our children in a negative manner. The current level of crudeness has already made a tough job tougher for those of us trying to train our children to be respectful and decent.

You have the authority, that has already been determined by our supreme court to be within your ability to decide, to set a better standard for our children and our country. Don't take us further down the slippery slide to a deeper pit. Please reject the proposed new standards.
