

I would appreciate it if our society upheld certain standards of morality, especially in regards to the type of media that stands to influence our children. Please do not allow any more nudity or profanity to air on television on public channels in America than is already allowed. The current amount is enough to make me careful about what I will allow my children to watch, but please do not make a decision that will prevent me from allowing my children to watch any television without concern for the vulgarity present there. Media can be used for educational and wholesome entertainment purposes. Please try to keep our media as entertaining as possible, not vulgar.
