

Allowing female nudity will further trivialize women and allow men to see women as objects. It will break down the opportunities for respect and good relationships between the sexes. It will encourage little girls to be sexual and little boys, including teenagers, to think of females as things, not friends and mates. It will do no good for anyone but the networks who only care about money. Our language is quickly being destroyed with wonderful words being lost and swear words taking their place. Be responsible. Do the right thing for all.
