

It is imperative that you NOT allow this "soft porn" into our television viewing. It is one thing to have a channel that caters to individuals who like or prefer TV shows and commercials with sexual content. There are cable channels and movies that provide those services by the viewers choice. So imposing profanities and visual obscenities to those regular viewers you are giving us. And will have non warning when these may pop up on the screen. This is damaging and, degrading to viewers, children and families who have chosen to not watch TV shows that include such things. I believe it is the job of FCC to protect the viewers and uphold the integrity of entertainment on the radio and television. Please vote NO to more explicit nudity and language on TV and Radio.

Thank you.
