

There is enough violence, sex, language on the internet, on pay TV and other areas in life, why do you feel you need to contribute to this festering wound of society. Don't kneel to the minority that feel nudity and language will not harm society, you can look at the news daily and see that our society worsens everyday, you should not consider adding fuel to the fire, do you want that kind of responsibility of maybe a five year old child seeing nudity or hearing the f-word when their parents have done their best to guard them from it? You hold an important responsibility, please take it seriously.
