

I fail to agree with the proposed new FCC policy to allow frontal nudity, no matter how briefly shown, & censored language on television. No matter who is the viewer, children, adults, people who are mentally unstable, it is absurd that this change would be beneficially to any viewer. I believe that throughout time, whenever we as a society have lowered our standards, such as this new policy would be doing, we are poorer as a nation for such actions. I pray that this doesn't occur.
