

We are against the FCC's proposal to relax the censorship of using the F-word and nudity on communications airwaves. Our society is having enough trouble with immoral behavior. We are at the point that we only watch very specific wholesome entertainment mainly from the 50's and 60's. Immorality and un-godliness are never in vogue. As US citizens, we demand that the FCC and all affiliates not lessen but increase censorship against gay/lesbian/anti-nuclear family/anti-God/profanity/nudity/sexuality/immorality/violence in any form. Our children and future generations will thank us for our firm stand against this vile wave of communication. Research has shown time again the influence that communications have on its citizens. Garbage in, garbage out. We want this action to honor our GOD and the LORD JESUS CHRIST and to help our nation to remain one nation under GOD.
