

Please DO NOT RELAX the rule of the "use of expletives which are used deliberate and repetitive in a patently offensive manner as a requisite to a finding of indecency". Our children (and we adults) are bombarded with curse words constantly. It takes no intellectual ability to use the f-bomb and other curse words and it doesn't add one bit of "realism" to programming as is often the excuse for their use in interviews and programming. Please take this opportunity to raise the standards of speech for our society instead of lowering them, and thus the encouragement of intelligence in speech for our society!

Additionally, please DO NOT LOWER THE NUDITY RESTRICTIONS of programming. As it is, just clicking through channels or through the internet, our children are assaulted by promiscuity and nudity. Considering the number of STDs, pregnancies in our schools, as well as the drop-out rate of young girls who give birth to children out of wedlock, we do not need to further add to the assault on our country's teens and young adults by relaxing the current nudity standards. I urge you to please take the high road in regulating the programming of television. It takes more artistic ability to "suggest" sexuality/nudity and so many so-called "artists" simply don't have the intellectual or artistic ability and must show everything blatantly. Please help to raise the intelligence and artistic ability of our children by not relaxing these standards and help people THINK for themselves.
