

The internet will suffice just fine for our entertainment needs, if you start allowing nudity and the f word on television programming! We WILL drop our service, as will Christians and decent people all over the Country. I guess people with filthy minds run the FCC. People with no conscience as to what this filth is doing to our kids/young people. You will just be hurting the TV Industry. What kind of people are you any way. Sex is all you think about. Trying to ruin our children with this junk. What a filthy minded society we live in. Not one descent person at the FCC will stand up against this filth. Toooooooooo Bad. We can live without you and the television. We can watch everything on the Web that television provides any way.
