

I am completely against any further allowance of profanity or nudity across our nation's airwaves. What we allow now has already taken things too far! I am mom to a very young toddler who repeats everything she hears and a special needs boy in his late teens that I already have to find creative ways to explain things he sees and hears. Please, for the love of our great nation, do not contribute any further to allowing our morals and values in this country to deteriorate any further.
