

I am completely APPOSED to the FCC dropping the ban on the F-bomb and to allowing nudity on network television. If this goes through and those things are allowed on TV I will no longer watch the major networks. I have impressionable children and I myself would be extremely offended. Keep that filth on pay per view or not at all would actually be better. This nation and its morals are heading down hill fast we should be ashamed of what has been allowed to happen. Other countries are appalled at what has happened here. I will protest and sign what ever petitions necessary to keep this from happening. Please have some respect for the good people of this nation instead of listening to the few that have no respect or morals.

Sincerely,

Melinda Jacobson
