

i was sharing photos from a cousin. a message came up i was doing something i should:nt and i was suspended for 3 days. i have compiled a list of complaints.1. screen comes up blank. 2.jumps back to start. 3.freezes up. 4.jumps from program to program.5.says fb not responding d/t long script. i have checked all troubleshooting on my computer and for viruses etc. my neighbors are complaining with the same things. there seems to be a problem with fb.
