

Please do not loosen the restrictions on nudity and swearing, especially when young children can be impacted. If anything, please raise the standards and bar to improve this further.

There have been few studies of the impact of the media content on individuals and society. It's only in very recent history that people have been so constantly exposed to extreme violence, verbally abusive language, and sexual content.

Even I, as an adult, cannot stand the constant assault without filter. Previously, individuals seeking this type of content had to locate specific materials to satisfy their interests. Now we are all exposed to it with little restraint. It's worse than a constant diet of fast food, it's like a constant diet of arsenic for the mind.

Please continue to be the filter our society needs, whether all realize it or not.
