

1. I am a free speech advocate. At the same time, I also believe in protecting our children. The f word can be used so quickly that children hear it before the parents can cut the volume. I urge that the f word not be allowed on TV nor radio.

2. In our culture we do not permit public nudity. There are places where it is permitted, but not in "general" public places. One must go to such places intentionally. I see no reason to allow it on TV where many of us go for entertainment. Such places are already available to those who wish to go to them. I urge you to please hold to the higher standards you now have.

Thank you for your time.
