

I lived near the Netherlands in the 1980's. They had nudity in advertising and Programs. We had 6 young children. Our only course was not to leave the TV on. When VHS came out that is all we watched.

Now I have many grandchildren and when the weather is bad I let them watch TV. IF this bill is passed, I will have to cut off the live TV again. IF others feel as I do, the advertisers won't get as many viewers.

I am also an avid radio listener. I will not listen to profanity.
