

I oppose any and all changes having to do with allowing foul language and/or nudity, no matter how "fleeting" the matter is or will be. It is immoral and indecent. Children listen to and view the airwaves more frequently than some would think. Children now are more violent and disrespectful, alot having to do with the public displays on television or even in person. This country was based on christian values, and is rapidly going downhill because of the indecent non-values America has adopted.
