

I believe that this should not be allowed. Television is already questionable as it is right now. I don't think children should have to deal with that. Full female frontal nudity is crazy to be allowed on television. No nudity at all is what it should be. That would start pornography with children at a younger age, and that is just not acceptable. It's like allowing children and people watch R rated movies on tv. I do not agree with this at all. As a teen who watches television, I do not want to hear those words, or see nudity of a female.
