

It would be a very sad day when we could no longer listen to radio and TV as a family because our children would not have their innocence protected. They are not born with filters and there is already a way to much of the world uncensored and thrown in their face. We would choose to go without cable, and regular radio and instead choose things like Netflix - no commercial based and radio stations like K-love and christian talk.

It's hard enough missing local news, sports, and weather, because TV commercials are not censored.

I oppose any changes to the current FCC indecency standards that would allow television and radio stations to broadcast expletives and nudity on the public airwaves, even if brief or "fleeting."

The Supreme Court has confirmed the FCC's authority to enforce policies regarding expletives and nudity, especially during times when children are likely to be watching or listening.

Relaxing the current policy would not serve the public interest and I urge the FCC to reject all proposals that would allow for the broadcast of expletives and nudity on FCC-licensed stations.
