

We are adding our desire to ask that the FCC oppose any changes to the current FCC indecency standards which would allow Television and/or Radio broadcasts to offer female or male nudity; and any expletives on public airwaves.

This practice must be avoided at all costs, particularly during times when young children are present. We are urging you to reject all proposals to allow both nudity and the use of expletives on any FCC-licensed stations whether radio or television.

Thank you for your consideration for our request.

Mr. & Mrs. Robert Macklin
