

I feel that the relaxation of the explicitness of nudity and/or language would not be in the best interest of the public and I believe it would/could be detrimental to certain age groups! Our children are exposed to enough on television now and there is rarely a family show on that I can sit with my family and watch without the fear that my 3 & 5 year will see or hear something inappropriate. Please very strongly consider opposing this request and keeping the current regulations and not exposing us to more explicit television!
