

I am in opposition to any changes in the FCC indecency standards that allows nudity or the use of explicatives even if brief or fleeting. In particular I am opposed to any changes that would allow such degrading material to air during hours when children may be watching. Our society needs to preserve our morality, protect our children and adults from exposure to evil, and encourage uplifting, motivating material that will improve lives.

I agree with the Supreme Court's decision to uphold the FCC's authority to enforce policies regarding explicatives and nudity.

I strongly urge the FCC to reject any proposal to alter the current standards for the broadcast of nudity and explicatives.
