

I oppose any changes to the current FCC indecency standards that would permit the broadcast of expletives and nudity on the public airwaves, even if such material is brief or fleeting.

I am an early childhood family education specialist. Recent studies have shown that the sexual innuendos and behaviors seen on television increase the sexual activity of adolescents. Allowing nudity on the public airwaves would only increase this problem.

I urge the FCC to reject any proposals that would allow for the broadcast of nudity and expletives on FCC-licensed stations.
