

Please do not allow the use of the f-word (fuck) on free radio and TV nor nudity on TV. If you do, our nation as we know it will further sink into depravity. As a youth, if one wanted pornography one had to get it from behind the counter of a store; I never did this. Now one only need to connect to the appropriate web site, and images can be delivered free to your computer.

Please, please, please for the sake of our country do not follow the path of some European countries.
