

The proposed changes to allow more inappropriate language on television and radio is very offensive. Our children are exposed to this far more than they should be in their lives, as a society we should not permit it into our homes. I will not allow my children to watch or listen to these words on my television or radio and I know many others feel the same way. You would be decreasing the number of viewers and listeners instead of increasing them. The degradation to women by allowing for the viewing of their private parts of their bodies is appalling. What are you teaching females about their value if their bodies exposed to any who happen to turn on the television? We should be striving to uplift others, not turn their bodies into objects. Please do not further degrade the programming on television and radio by implementing these changes.
