

Please don't make changes to your indecency policy to make it more relaxed! Those who make the choice to see and hear those kinds of things have plenty of access to it; it doesn't need to be made easier. As a mother of young children, and I am already very concerned about what they might see on television. I don't want things such as frontal nudity and the f-word readily available to them. This is such a shame. Please do not make these things legal!
