

I believe it is inappropriate for women frontal nudity and vulgar language to be used on the airwaves and on network television showtimes. If this ends up happening count on a lot of families entirely dropping their cable and it destroying the advertising industry, because we will not watch it or allow our children to have access to it. I believe we are desensitizing our children when we allow such inappropriate information to be made available to them. Please act accordingly and do not change the current standards. They are already loose even as it is. Thank you for your consideration in this matter.
