

Please do not allow more sexually or verbally vulgar language to network tv or any electronic mediums. This is not good for children, but it is also not good for adults.

There are millions of children and teens unsupervised by adults who will only add to our welfare roles by committing behaviors that are seen on TV. Please help us maintain some kind of decency in society. Hollywood is the only place that advocates this kind of behavior. The rest of the country is just trying to hold onto good basic values and character traits. Please don't foster the opposite. In addition to file a comment we should not have to have our information broadcast to the world through the web. My goodness don't you know about identity theft.
