

It isn't right that the FCC change what is shown and said on TV and Radio. There are many children out there who are listening and watching. Even if some parents don't care what their children are watching or listening to we as a people should be above this. Do not change these things that will make our nation less than what it is. I don't want my children to see nudity or hear the words they are going to allow to be said. If this goes through I won't have it in my home. We can watch and speak without using these words and seeing these things. It isn't right!!!!
