

I oppose any changes to the current FCC indecency standards that would allow television and radio to broadcast explosives and nudity scenes through the airwaves. In fact I urge the FCC to enforce the standards now in place. Any nudity however brief or fleeting have been known to have emotional mentally effects on children and to a broader extend to adults with minor mental disabilities, and to a lesser extend even those with a healthy state of mind. In my opinion, the crime wave of rape has been growing to an enormous extend ever since the FCC started to become lax on indecency laws during the early 70's .
