

I am writing this email concerning the possible changes being made to the ban on nudity and expletives that are aired on t.v. and radio. I want to make known I strongly oppose any lift of the ban in place for the sake of this generation and generations to follow. I do not believe it is in the best interest of anyone in this country for the ban to be lifted and implore anyone involved with this decision to really consider the many consequences of such action. The damage cannot be undone after the decision is made.
