

I am filing to submit that I am against relaxing the FCC standards in regards to any nudity, sexual or not, no matter how brief. Those images will remain in the the minds of our children and have been shown to be very detrimental to their overall health and success, as well as the health of our community. They are already assaulted by vulgarity at school and they should not have additional venues opened for such language. Please consider our position on this and not lax on the standards that help protect us and our children from explicit vulgarity and nudity.
